

Photoneo

Products overview

Complex provider of 3D vision for smart automation

Strong Vision - Strong Team

“We provide robots with eyes, not only to see but also to understand.”

Employ 150+ people globally

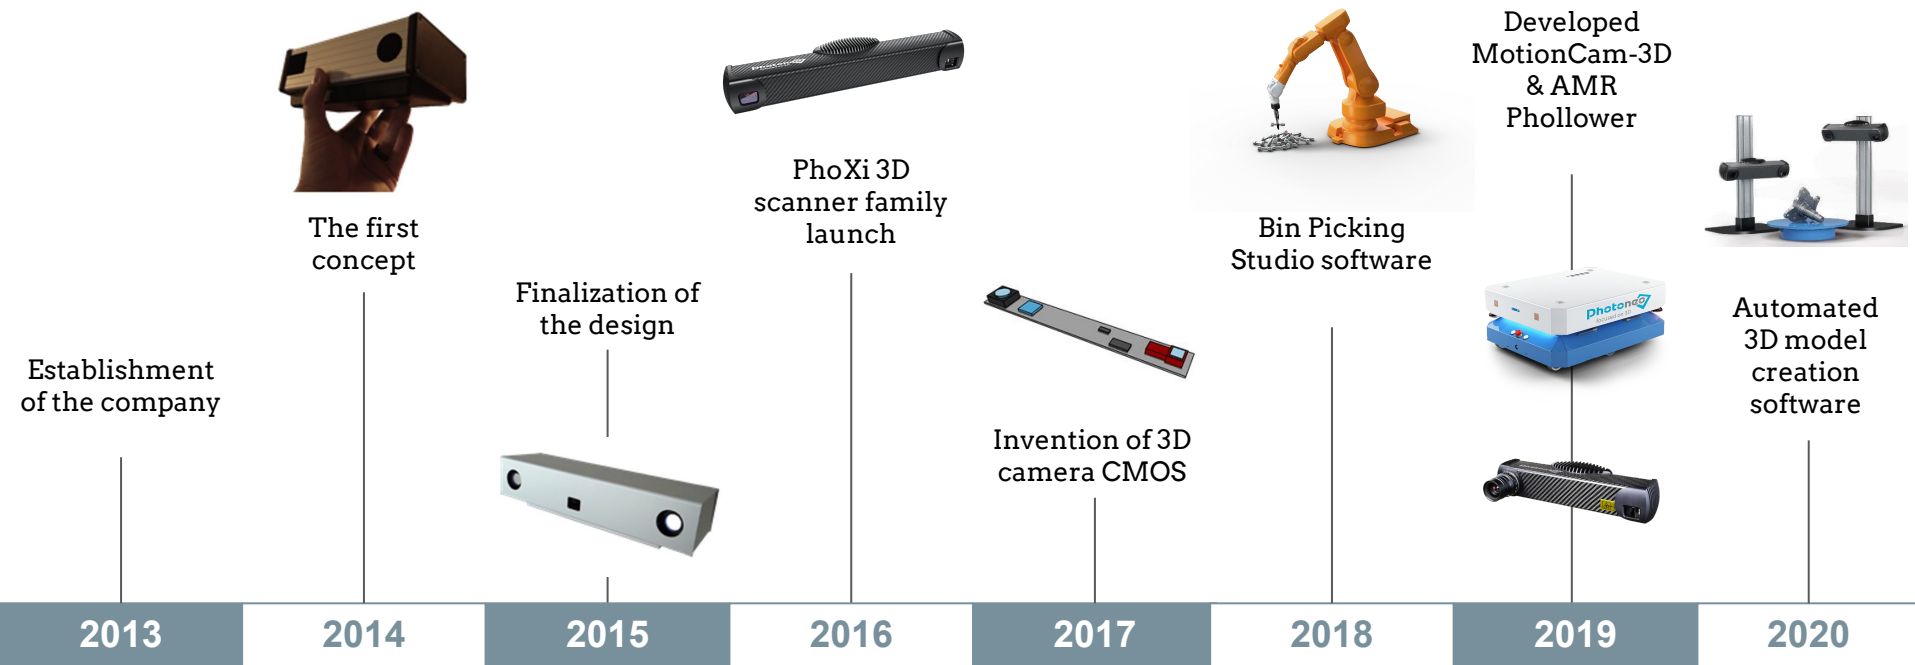

Sold 1700+ scanners
worldwide

Winner of 5
“best-in-class awards”

Our product development

Application
integrator

Bin Picking
Depalletization
AI based picking

**Complimentary portfolio for advanced
automation**

PhoXi 3D Scanners family

ADVANTAGES OF PHOXI 3D SCANNERS

Large depth of scan

High accuracy

Robust performance

Easy integration

Use cases

Object manipulation

Bin picking

Pick & place

Trajectory
correction

Inspection

Completeness
check

Recognition

Sorting

Engineering

3D modeling

Palletizing

Assembly

Packaging

Measurements

3D OCR

Reverse
engineering

MotionCam-3D

The highest resolution and highest accuracy area-based 3D
Camera for scanning in rapid motion in the world

**VISION
AWARD
2018**

Winner

VisionSystems
**2019 Innovators
Awards**
PLATINUM

Resolution
~ 0.5 Mpx

Max. object speed
40 m/s

Max. FPS
20 fps

Phollower 100

Autonomous mobile robot for transport and delivery of material.

Safety

- Environment checked 33 times per second
- Detecting objects with a minimum width 30 mm
- Safety class SIL2 PL.d Category 3

Mapping

- Real-time robot navigation by controlling movements with a joystick
- Instant map redrawing

Trajectory planning

- Quick and easy
- Speed zones and limits (max. speed: 1.125 m/s)
- Cyclic or dynamical move plans
- Reversible movement

Bin Picking Studio - for all integrators

General solution for all bin picking application

- Easy and intuitive web-based configurator
- Choose robot brand and model (>120 types)
- Choose gripper and 3D Scanner
- Load CAD files - object, gripper, environment
- Define grasping method - only with mouse
- Visualize and validate

ABB

FANUC

KUKA

OMRON

 **MITSUBISHI
ELECTRIC**

 **Kawasaki**

STÄUBLI

YASKAWA

ROBOTS**

CAD based localization

AI based picking - AnyPick

We can pick anything!

- Machine learning solution for e-commerce, warehouses, logistics and processing of parts that vary in shape or size
- AI-based location detection allowing to pick any object from 1x1 cm (no CAD models needed)
- High speed - up to 500 picks per hour

Warehouses/ e-commerce

Objects of irregular shape

Food handling

AI based picking - variations

Universal
Depalletization

Board Picking

Envelopes

- Predefined solutions - ready to be deployed
- Pretrained - works out-of-the-box

Automated 3D model creation

Fast one-click solution for any kind of objects

- Fast model creation in 1-2 minutes
- Smallest feature detection ~ 0,2 mm
- Custom size of the rotary table
- Any number of scanners
- Output formats: PLY, STL
- Accuracy from 50 μ m

Applications

Inspection & metrology

3D modelling & reconstruction

Reverse engineering
